YOKOHAMA
Performance Radials

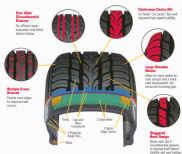

NOW YOU'VE GOT CONTROL.

High Performance Handling. All-Season Confidence.

The RVID H4s/V4s radial takes the daily drive to new levels of comfort and performance. It will heighten your expectations about the capabilities of high performance, all-season tires. Perfectly balancing performance, mileage and comfort, you'll enjoy the exceptional steering response, superior wet and dry traction, confident braking and outstanding durability coupled with a comfortable, quiet ride.

True to its Yokohama heritage, the RVID H4s/V4s follows the tread path of Yokohama's race-bred technologies. It features cutting-edge advances in tread compound and design that faithfully deliver extraordinary wet and dry maneuverability with exceptional treadwear. You can count on this radial for solid, predictable performance, drive after drive.

With its confident control, contemporary look and unmatchable value, the RVID H4s/V4s is everything you expect in all-season high performance – and more.

The purchaser of a set of RVID H4s/V4s radials before December 31, 2004 benefits from a 30-day trial offer.

New Advances in Tread Compound and Design

The remarkable performance offered by the RVID H4s/V4s is the product of key design features including specialized compound technology.

Optimized Contact Patch

Wet and dry maneuverability has been technologically advanced by optimizing the shape of the contact patch to deliver superior, all-season handling.

Revolutionary Tread Compound

Its all-new compound extends visible mileage and delivers exceptional levels of grip on wet and dry roads.

Exceptional Tread Design

The computer-simulated tread pattern provides more tread wear and better traction in wet and winter conditions.

Available in a wide range of sizes in H and U speed ratings.

RVID H4s/V4s
